## PROFESSIONAL SUMMARY

Product Manager with 4+ years of experience delivering digital products in fintech and enterprise environments — spanning consumer mobile apps, internal operational platforms, and cross-functional delivery in regulated financial services. At PT Bussan Auto Finance, I own the full product lifecycle across BAF Mobile and BOSS (internal business operations platform), managing end-to-end delivery for a team of 19 across backend, frontend, QA, and design.

I close the gap between business intent and engineering execution — building requirement frameworks that reduced ambiguity by 30%, introducing Agile governance where none existed, and shipping features with 0 major defects. I think in outcomes, not outputs, and I am now seeking a Senior PM role in fintech or multifinance where I can own a product area, drive discovery, and build something that compounds.

---

## PROFESSIONAL EXPERIENCE

**Product Manager** (Official Title: Product Owner & UI/UX Specialist)

Sep 2023 – Present

Product lines: BAF Mobile (consumer app) · BOSS Internal Platform  
(OPS workflows, reconciliation, submission engine)

**PT Bussan Auto Finance (BAF) · Jakarta · Fintech / Multifinance**

### Key Achievements:

- Led end-to-end delivery for **10+ initiatives** across two product lines managing a cross-functional team of 19 (BE, FE, QA, design)
- Improved requirement clarity by **30%** through redesigned BRD→FSD intake workflow and stakeholder alignment workshops
- Delivered BAF Mobile features — Deep Link Engine, FDE Flow, Email Verification — with **0 production defects** across 3 release cycles
- Reduced SIT/UAT rework by introducing negative-case coverage and structured EPIC breakdowns into the delivery process
- Built and maintained Agile delivery cadence, refinement structure, and sprint governance across 3 teams in a previously unstructured environment
- Managed multi-stakeholder alignment across Business Enablement, IT leadership, compliance, and engineering in a regulated multifinance environment
- Increased cross-team clarification speed by ~25% after standardizing the BRD→FSD handover workflow

**Digital Product Manager**

Aug 2022 – Sep 2023

Product lines: Danamas Lender Platform (mobile + web) · Jido Gold

**PT Danamas (Sinarmas Group) · Jakarta · Fintech Lending**

### Key Achievements:

- **Owned full product roadmap** for Danamas Lender Platform (mobile + web) — from discovery through launch
- Delivered revamped Danamas Lender App, improving user engagement metrics and supporting revenue growth targets
- Built and launched Jido Gold from **0 to first users**, leading cross-functional discovery across UX, engineering, data, and compliance
- Managed payment rail integrations with BNI, Instamoney, and internal payment infrastructure

- Led cross-functional discovery process spanning UX research, data analysis, engineering scoping, and compliance review

**Associate Product Manager**  
**Sicepat Ekspres Indonesia · Jakarta · Logistics Technology**

Aug 2021 – Aug 2022

**Key Achievements:**

- Delivered first-mile outlet platform deployed across nationwide branches
- Launched driver management platform (mobile + web), improving field operations efficiency
- Improved sprint delivery speed by **18% MoM** through backlog restructuring and EPIC breakdown optimization

**Earlier Roles**

Technical Writer & System Analyst (2017–2021) · Pegadaian (via Avows) · WebCenter · Gauri Optima Sukses · Documentation, system analysis, administrative operations

**EDUCATION**

---

**Bachelor's Degree — Information Technology** · UIN Sultan Syarif Kasim Riau

**NOTABLE INITIATIVES**

---

- Led Agile transformation across BOS, BAF Mobile, and BAF Web teams — introduced refinement cadence, sprint governance, and ceremony structure from scratch
- Designed requirement traceability framework and cycle time tracking dashboard for internal delivery visibility
- Created UX prototypes for approval flows and mobile verification journeys used as design handoff artifacts
